

### Totally Enclosed Lifeboat

Category:	Life boat & Rescue Boat
Material:	GRP
Standards:	According to the latest regulations of SOLAS and international standards to design and build.
Certificate:	ABS, BV, CCS, DNV, EC, GL, LR, NK, RINA, KR etc.
Fob Price:	<a href="#">Get Latest Price Now</a>
Place of Origin:	China

### Product Description:

Totally enclosed lifeboat can assure your life with gravity luffing arm type davit or platform davit to raise and load. it is suitable in worse sea condition, for example the ocean boat, it is high fire-resistant.

Totally enclosed lifeboat is designed in accordance with 1996 amendments to SOLAS 1974 and LSA Code amendment by MSC218(82) and MSC81(70) amendment by MSC226(82) and MSC.272(85).

The hull of lifeboat is made of the fire reinforced plastic(F.R.P.).

The space between the inside and outside hull is filled with polyurethane foam which will supply sufficient buoyancy for the boat.

Launching using conventional davits, it is designed to safely evacuate crew from vessels and offshore platforms. All lifeboats are equipped with the latest On/Off load release systems. Designed for easy use by ship crew.

we can supply the various lifeboat(like open type lifeboat, freefall lifeboats , totally enclosed lifeboat, and partially enclosed lifeboat.) and suitable davit with very competitive price and soonest delivery time.

We also provide platform/offshore davit,free fall lifeboat landing unit,single arm rotary davit and crane,hydraulic slewing crane&rescue boat liferaft davit,high speed rescue boat langing unit,electrical lifeboat winch,electrical rescue boat winch,and inverted arm gravity davit.

### Technical Parameter:
